Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development)

Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development)

This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life – learning mathematics and starting primary or elementary school. The chapters take a variety of perspectives, and integrate these two components in sometimes explicit and sometimes more subtle ways.

The key issues and themes explored in this book are:

- the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life;
- the opportunities provided by transition to school for young children's mathematics learning;
- the importance of partnerships among adults, and among adults and children, for effective school transitions and mathematics learning and teaching;
- the critical impact of expectations on their mathematics learning as children start school;
- the importance of providing children with meaningful, challenging and relevant mathematical experiences throughout transition to school;
- the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers;
- the importance for the aspirations of children, families, communities, educators and educational organisations to be recognised as legitimate and key determinants of actions, experiences and successes in both transition to school and mathematics learning; and
- the belief that young children are powerful mathematics learners who can demonstrate this power as they start school.

In each chapter, authors reflect on their work in the area of mathematics and transition to school, place that work within the overall context of research in these fields, predict the trajectory of this work in the future, and consider the implications of the work both theoretically and practically.

From reader reviews:

Jennifer Dillon:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new details. When you read a publication you will get new information since book is one of several ways to share the information or even their idea. Second, examining a book will make anyone more imaginative. When you reading a book especially tale fantasy book the author will bring you to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other people. When you read this Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development), you may tells your family, friends along with soon about yours book. Your knowledge can inspire different ones, make them reading a reserve.

Michael Griffin:

Reading a book tends to be new life style in this particular era globalization. With reading you can get a lot of information that will give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story or perhaps their experience. Not only the story that share in the guides. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on earth always try to improve their ability in writing, they also doing some exploration before they write for their book. One of them is this Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development).

Phyllis Sharrow:

Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development) can be one of your beginner books that are good idea. We recommend that straight away because this book has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to set every word into pleasure arrangement in writing Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development) but doesn't forget the main place, giving the reader the hottest and also based confirm resource details that maybe you can be certainly one of it. This great information can certainly drawn you into fresh stage of crucial contemplating.

Kara Hogan:

Many people spending their time by playing outside with friends, fun activity along with family or just watching TV all day every day. You can have new activity to invest your whole day by looking at a book. Ugh, think reading a book will surely hard because you have to use the book everywhere? It all right you can

have the e-book, having everywhere you want in your Smart phone. Like Mathematics and Transition to School: International Perspectives (Early Mathematics Learning and Development) which is getting the e-book version. So , try out this book? Let's view.
