**The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing) (v. 165)** Armando Freitas da Rocha, Eduardo Massad, Alfredo Pereira

We could start writing this book by saying, with several other authors, that the brain is the most powerful and complex information processing device known, whether naturally developed or created artificially. Although we fully agree with this statement, in doing so we would be misleading the reader, in the sense that the present book basically aims to formalize the knowledge concerning brain physiology accumulated over the past few decades. Instead of merely describing the complexity of the cerebral structure or presenting a collection of commentaries and reviews of interesting experimental results, we take into account novel achievements in quantum information and quantum computation, and avail ourselves of recently developed mathematical tools. Neuroscience was born in the 19<sup>th</sup> century with the works of Paul Broca. However, this fledgling field experienced a boom only in recent times, following the development of powerful non-invasive techniques for probing the neural circuitry supporting the complex cognitive functions of the human brain. Although sophisticated mathematical models and physical theories are the basic tools behind the conceptual foundations and analytical implementation of these modern techniques, to the best of our knowledge no effort was made to formalize the actual knowledge about brain function into a coherent theoretical framework incorporating the recent developments in mathematical and physical science. Addressing this lack was our first motivation in writing this book.

### **From reader reviews:**

#### **Jay Burke:**

The book *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165) can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165)? Wide variety you have a different opinion about e-book. But one aim which book can give many info for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or facts that you take for that, you can give for each other; you can share all of these. Book *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165) has simple shape but the truth is know: it has great and big function for you. You can appear the enormous world by available and read a e-book. So it is very wonderful.

#### **Melvin Belknap:**

Hey guys, do you really wants to finds a new book to see? May be the book with the name *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165) suitable to you? Often the book was written by famous writer in this era. Often the book untitled *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165) is one of several books this everyone read now. This book was inspired many men and women in the world. When you read this reserve you will enter the new way of measuring that you ever know just before. The author explained their plan in the simple way, therefore all of people can easily to be aware of the core of this reserve. This book will give you a lot of information about this world now. To help you to see the represented of the world in this particular book.

#### **Douglas Ham:**

Playing with family in a park, coming to see the coastal world or hanging out with close friends is thing that usually you might have done when you have spare time, subsequently why you don't try thing that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love *The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing)* (v. 165), you could enjoy both. It is good combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't understand it, oh come on its called reading friends.

#### **Theresa Kuykendall:**

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just small students that has reading's internal or real their passion. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see

colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this The Brain: Fuzzy Arithmetic to Quantum Computing (Studies in Fuzziness and Soft Computing) (v. 165) can make you sense more interested to read.
