**Problems on Material and Energy Balance Calculation** K. Balu, N. Satyamurthi, S. Ramalingam, B. Deebika

Mass and Energy Balance Calculations are the fundamental components in the Design and Development of Chemical Process Industries. Mass Balance Calculations are performed to determine the yields of main products, byproducts, consumption of raw material and production losses. Only when the Mass Balance is performed, the Process Engineer can make calculations required for design of production equipment in the process. Energy balance involves the computation of input and outputs of energy in equipments. Energy Balance is performed from Material Balance taking into account the thermal effects (Exothermic or Endothermic) of reactions and the physical transformations (Evaporation, Crystallization) occurring in the Process Equipment. The present book has problems and solutions in Material and Energy Balance in Process Equipment. This is followed by Energy Balance problems. All problems assume Steady State system. The text covers the syllabus of all Chemical Engineering Schools offering this course. The number and variety of problems proposed in this book are extensive. The problems are organized in each chapter according to subject matter. It is possible for answers to differ slightly due to different sources of data. The teaching experience of authors convinces that one of the glaring weakness of the students in Chemical and Petroleum Engineering is their inability to think clearly and accurately in terms of arithmetic. It is hoped this book will prove of real value in Process Calculations Instructions in classroom. This can also serve as a refresher book for practising engineers.

**From reader reviews:**

**James Goodman:**

The book Problems on Material and Energy Balance Calculation make you feel enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting anxiety or having big problem together with your subject. If you can make reading a book Problems on Material and Energy Balance Calculation to become your habit, you can get far more advantages, like add your own capable, increase your knowledge about a few or all subjects. You can know everything if you like open up and read a book Problems on Material and Energy Balance Calculation. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other folks. So , how do you think about this publication?

**Thomas Baldwin:**

Information is provisions for those to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider if those information which is from the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you have the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Problems on Material and Energy Balance Calculation as the daily resource information.

**Margaret James:**

This book untitled Problems on Material and Energy Balance Calculation to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this kind of book in the book store or you can order it via online. The publisher with this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

**Nancy Soto:**

This Problems on Material and Energy Balance Calculation is great reserve for you because the content and that is full of information for you who all always deal with world and possess to make decision every minute. This kind of book reveal it facts accurately using great arrange word or we can say no rambling sentences within it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but tough core information with lovely delivering sentences. Having Problems on Material and Energy Balance Calculation in your hand like getting the world in your arm, info in it is not ridiculous a single. We can say that no e-book that offer you world within ten or fifteen minute right but this e-book already do that. So , this really is good reading book. Hello Mr. and Mrs. busy do you still doubt that will?
