Cardiac Electrophysiology: From Cell to Bedside, 4e Douglas Zipes, Jose Jalife

Here's today's most authoritative and up-to-date information on basic and clinical electrophysiology. The 4th Edition covers everything from fundamental explanations of currents and channels, through the theoretical and experimental bases of cardiac electrical activity and arrhythmias, to current clinical understandings of arrhythmias and their treatment-and features the most comprehensive updating and revision to date.

- Covers today's hottest topics, including HCN channels · stretch-activated channels · inward rectifier channels · contraction-excitation feedback · nerve sprouting and arrhythmias · mechanisms of atrial fibrillation · mechanisms of ventricular fibrillation · transgenic and knockout models of cardiac arrhythmias · pharmacogenomics and cardiac arrhythmias · Brugada syndrome · and more.
- Features the expertise of 57 new contributors; and, existing contributors have revised and updated completely different chapters from previous editions.
- Presents 23 new chapters, including Stretch Activated Channels in the Heart · Biophysical Properties of Inward Rectifier Channels · Human Molecular Genetics and the Heart · Human Genetics of Channelopathies · and more.
- Includes revised and updated discussions of calcium channels · voltage regulated potassium channels · membrane pumps and exchangers · connexins · homomeric and heteromeric gap junctions · pharmacology of L-type and T-type channels in the heart · mechanisms of AV nodal excitability and propagation · theory of reentry · rotors and spiral waves in two dimensions · electrical remodeling and chronic atrial fibrillation · mechanisms of initiation of ventricular tachyarrhythmias · atrial fibrillation · ventricular tachycardia · long QT syndrome · Torsades de pointes · more!

From reader reviews:

Jonathan Woods:

Playing with family in a park, coming to see the water world or hanging out with friends is thing that usually you could have done when you have spare time, and then why you don't try issue that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Cardiac Electrophysiology: From Cell to Bedside, 4e, you are able to enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't obtain it, oh come on its known as reading friends.

Jack Nguyen:

Do you really one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't evaluate book by its cover may doesn't work this is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer is usually Cardiac Electrophysiology: From Cell to Bedside, 4e why because the fantastic cover that make you consider in regards to the content will not disappoint you actually. The inside or content will be fantastic as the outside or even cover. Your reading 6th sense will directly guide you to pick up this book.

Patrick Bodin:

You are able to spend your free time to read this book this book. This Cardiac Electrophysiology: From Cell to Bedside, 4e is simple bringing you can read it in the area, in the beach, train in addition to soon. If you did not possess much space to bring often the printed book, you can buy the particular e-book. It is make you easier to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Helen Richards:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or illustrated from each source that filled update of news. On this modern era like at this point, many ways to get information are available for a person. From media social just like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Cardiac Electrophysiology: From Cell to Bedside, 4e when you necessary it?
