Robert Goldblatt

Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) Robert Goldblatt

An introduction to nonstandard analysis based on a course given by the author. It is suitable for beginning graduates or upper undergraduates, or for self-study by anyone familiar with elementary real analysis. It presents nonstandard analysis not just as a theory about infinitely small and large numbers, but as a radically different way of viewing many standard mathematical concepts and constructions. It is a source of new ideas, objects and proofs, and a wealth of powerful new principles of reasoning. The book begins with the ultrapower construction of hyperreal number systems, and proceeds to develop one-variable calculus, analysis and topology from the nonstandard perspective. It then sets out the theory of enlargements of fragments of the mathematical universe, providing a foundation for the full-scale development of the nonstandard methodology. The final chapters apply this to a number of topics, including Loeb measure theory and its relation to Lebesgue measure on the real line. Highlights include an early introduction of the ideas of internal, external and hyperfinite sets, and a more axiomatic set-theoretic approach to enlargements than is usual.

From reader reviews:

Mollie Walker:

Book is to be different for every single grade. Book for children till adult are different content. As we know that book is very important for all of us. The book Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) had been making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The book Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) is not only giving you far more new information but also to become your friend when you sense bored. You can spend your own personal spend time to read your publication. Try to make relationship with the book Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics). You never sense lose out for everything if you read some books.

Latosha Page:

This Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) book is just not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) without we comprehend teach the one who reading through it become critical in considering and analyzing. Don't always be worry Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) can bring any time you are and not make your handbag space or bookshelves' become full because you can have it in the lovely laptop even telephone. This Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) having very good arrangement in word along with layout, so you will not sense uninterested in reading.

Douglas Quintanar:

Why? Because this Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in Mathematics) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will jolt you with the secret the idea inside. Reading this book next to it was fantastic author who else write the book in such remarkable way makes the content within easier to understand, entertaining approach but still convey the meaning completely. So , it is good for you for not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of advantages than the other book include such as help improving your proficiency and your critical thinking technique. So , still want to hesitate having that book? If I were being you I will go to the guide store hurriedly.

Fernando Gallimore:

You can get this Lectures on the Hyperreals: An Introduction to Nonstandard Analysis (Graduate Texts in

Mathematics) by look at the bookstore or Mall. Just viewing or reviewing it can to be your solve problem if you get difficulties for the knowledge. Kinds of this publication are various. Not only by means of written or printed but also can you enjoy this book by e-book. In the modern era just like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose suitable ways for you.
