Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Jiti Gao

Useful in the theoretical and empirical analysis of nonlinear time series data, semiparametric methods have received extensive attention in the economics and statistics communities over the past twenty years. Recent studies show that semiparametric methods and models may be applied to solve dimensionality reduction problems arising from using fully nonparametric models and methods. Answering the call for an up-to-date overview of the latest developments in the field, **Nonlinear Time Series: Semiparametric and Nonparametric Methods** focuses on various semiparametric methods in model estimation, specification testing, and selection of time series data.

After a brief introduction, the book examines semiparametric estimation and specification methods and then applies these approaches to a class of nonlinear continuous-time models with real-world data. It also assesses some newly proposed semiparametric estimation procedures for time series data with long-range dependence. Even though the book only deals with climatological and financial data, the estimation and specifications methods discussed can be applied to models with real-world data in many disciplines.

This resource covers key methods in time series analysis and provides the necessary theoretical details. The latest applied finance and financial econometrics results and applications presented in the book enable researchers and graduate students to keep abreast of developments in the field.

From reader reviews:

James Sanford:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a walk, shopping, or went to the actual Mall. How about open or even read a book allowed Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)? Maybe it is being best activity for you. You understand beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with their opinion or you have various other opinion?

John Yates:

The book Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) can give more knowledge and information about everything you want. Why then must we leave the good thing like a book Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)? A number of you have a different opinion about e-book. But one aim that book can give many information for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or info that you take for that, you may give for each other; you could share all of these. Book Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) has simple shape nevertheless, you know: it has great and big function for you. You can appear the enormous world by available and read a book. So it is very wonderful.

Claire Davis:

Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) can be one of your starter books that are good idea. We recommend that straight away because this guide has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The writer giving his/her effort to set every word into delight arrangement in writing Nonlinear Time Series: Semiparametric and Nonparametric Methods (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) although doesn't forget the main level, giving the reader the hottest and also based confirm resource facts that maybe you can be one among it. This great information may drawn you into completely new stage of crucial imagining.

Patricia Ramirez:

In this era globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The actual book that

recommended to you personally is *Nonlinear Time Series: Semiparametric and Nonparametric Methods* (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) this guide consist a lot of the information in the condition of this world now. This specific book was represented so why is the world has grown up. The language styles that writer use for explain it is easy to understand. The writer made some investigation when he makes this book. This is why this book ideal all of you.
