Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) Philippe Baptiste, Claude Le Pape, Wim Nuijten

Constraint Programming is a problem-solving paradigm that establishes a clear distinction between two pivotal aspects of a problem: (1) a precise definition of the constraints that define the problem to be solved and (2) the algorithms and heuristics enabling the selection of decisions to solve the problem.

It is because of these capabilities that Constraint Programming is increasingly being employed as a problem-solving tool to solve scheduling problems. Hence the development of Constraint-Based Scheduling as a field of study.

The aim of this book is to provide an overview of the most widely used Constraint-Based Scheduling techniques. Following the principles of Constraint Programming, the book consists of three distinct parts:

- The first chapter introduces the basic principles of Constraint Programming and provides a model of the constraints that are the most often encountered in scheduling problems.
- Chapters 2, 3, 4, and 5 are focused on the propagation of resource constraints, which usually are responsible for the "hardness" of the scheduling problem.
- Chapters 6, 7, and 8 are dedicated to the resolution of several scheduling problems. These examples illustrate the use and the practical efficiency of the constraint propagation methods of the previous chapters. They also show that besides constraint propagation, the exploration of the search space must be carefully designed, taking into account specific properties of the considered problem (e.g., dominance relations, symmetries, possible use of decomposition rules).

Chapter 9 mentions various extensions of the model and presents promising research directions.

From reader reviews:

John Champlin:

Book is written, printed, or outlined for everything. You can realize everything you want by a e-book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Adjacent to that you can your reading skill was fluently. A book Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) will make you to become smarter. You can feel a lot more confidence if you can know about anything. But some of you think that open or reading a new book make you bored. It isn't make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

Carol Jackson:

Book is to be different for every grade. Book for children until finally adult are different content. As we know that book is very important normally. The book Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) ended up being making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The book Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) is not only giving you more new information but also to become your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship together with the book Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science). You never truly feel lose out for everything should you read some books.

Jane Mansour:

Nowadays reading books be a little more than want or need but also be a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with education and learning books but if you want experience happy read one along with theme for entertaining including comic or novel. The actual Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) is kind of guide which is giving the reader unstable experience.

John Cheung:

Spent a free time to be fun activity to try and do! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday.

The first thing you ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the guide untitled Constraint-Based Scheduling: Applying Constraint Programming to Scheduling Problems (International Series in Operations Research & Management Science) can be good book to read. May be it might be best activity to you.
