Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law)

Concerns have been expressed that gene patents might result in restricted access to research and health care. The exponential growth of patents claiming human DNA sequences might result in patent thickets, royalty stacking and, ultimately, a 'tragedy of the anti-commons' in genetics. The essays in this book explore models designed to render patented genetic inventions accessible for further use in research, diagnosis or treatment. The models include patent pools, clearing house mechanisms, open source structures and liability regimes. They are analysed by scholars and practitioners in genetics, law, economics and philosophy. The volume looks beyond theoretical and scholarly analysis by conducting empirical investigation of existing examples of collaborative licensing models. Those models are examined from a theoretical perspective and tested in a set of operational cases. This combined approach is unique in its kind and prompts well founded and realistic solutions to problems in the current gene patent landscape.

From reader reviews:

Judith Jordan:

The book Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) can give more knowledge and information about everything you want. So just why must we leave a very important thing like a book Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law)? A few of you have a different opinion about e-book. But one aim that will book can give many facts for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or details that you take for that, you are able to give for each other; you can share all of these. Book Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) has simple shape however, you know: it has great and large function for you. You can look the enormous world by available and read a guide. So it is very wonderful.

Mary McKay:

Reading a book being new life style in this year; every people loves to read a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, as well as soon. The Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) offer you a new experience in examining a book.

Tom Harris:

That reserve can make you to feel relax. This specific book Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) was vibrant and of course has pictures on the website. As we know that book Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) has many kinds or genre. Start from kids until teens. For example Naruto or Investigation company Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading this.

Peter Lombard:

As a college student exactly feel bored in order to reading. If their teacher questioned them to go to the

library or even make summary for some book, they are complained. Just little students that has reading's spirit or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Gene Patents and Collaborative Licensing Models: Patent Pools, Clearinghouses, Open Source Models and Liability Regimes (Cambridge Intellectual Property and Information Law) can make you really feel more interested to read.
