The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965

Angela N. H. Creager

The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 Angela N. H. Creager
We normally think of viruses in terms of the devastating diseases they cause, from smallpox to AIDS. But in *The Life of a Virus*, Angela N. H. Creager introduces us to a plant virus that has taught us much of what we know about all viruses, including the lethal ones, and that also played a crucial role in the development of molecular biology.

Focusing on the tobacco mosaic virus (TMV) research conducted in Nobel laureate Wendell Stanley's lab, Creager argues that TMV served as a model system for virology and molecular biology, much as the fruit fly and laboratory mouse have for genetics and cancer research. She examines how the experimental techniques and instruments Stanley and his colleagues developed for studying TMV were generalized not just to other labs working on TMV, but also to research on other diseases such as poliomyelitis and influenza and to studies of genes and cell organelles. The great success of research on TMV also helped justify increased spending on biomedical research in the postwar years (partly through the National Foundation for Infantile Paralysis's March of Dimes)—a funding priority that has continued to this day.

From reader reviews:

Kurt Haney:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by examining books. It is a good choice for yourself but the problems coming to a person is you don't know what type you should start with. This The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 is our recommendation to make you keep up with the world. Why, because this book serves what you want and wish in this era.

Donna Vazquez:

The ability that you get from The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 will be the more deep you excavating the information that hide within the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to understand but The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 giving you thrill feeling of reading. The copy writer conveys their point in particular way that can be understood through anyone who read the idea because the author of this book is well-known enough. This specific book also makes your current vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this specific The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 instantly.

Marlin Peterson:

Playing with family within a park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, subsequently why you don't try matter that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965, it is possible to enjoy both. It is excellent combination right, you still need to miss it? What kind of hangout type is it? Oh occur its mind hangout men. What? Still don't have it, oh come on its called reading friends.

Ralph Overman:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book had been rare? Why so many query for the book? But any people feel that they enjoy intended for reading. Some people likes reading through, not only science book but in addition novel and The Life of a Virus: Tobacco Mosaic Virus as an Experimental Model, 1930-1965 or even others sources were given understanding for you. After you know how the fantastic a book, you feel desire to read more and more. Science e-book was created for teacher or maybe students especially. Those guides are helping them to add their knowledge. In different case, beside science publication, any other book likes The Life of a Virus: Tobacco Mosaic Virus as an

Experimental Model, 1930-1965 to make your spare time more colorful. Many types of book like this one.
